Professional Summary

Full-Stack Web and App Developer with a passion for building modern, performant digital experiences. Experienced in developing scalable web platforms, real-time systems, and robust backend architectures. Adept at crafting user-centric interfaces, integrating APIs, and deploying full-stack solutions with cloud-native tools. Proven success in marketplaces, polling apps, and cybersecurity dashboards.

Technical Skills

- **Languages:** JavaScript, Python, Java, PHP, C, CSS, SCSS
- **Frontend Mobile:** React.js, React Native, Next.js, HTML5, Tailwind, SCSS
- **Backend:** Node.js, Express, Flask, REST APIs, WebSockets
- **Databases:** Firebase, MongoDB, PostgreSQL, MySQL
- **Infrastructure:** Docker, NGINX, Redis, CI/CD, Linux Shell
- **Cloud:** AWS, Google Cloud, Firebase, DigitalOcean
- **Tools:** Git, Postman, VS Code, Figma, Blender
- **Soft Skills:** Agile Development, Documentation, Problem-Solving, Team Collaboration

Work Experience

Product Developer — Meshables

Jul 2024 – Present

- Launched Meshables, a web-based asset marketplace for developers with a real-time backend.
- Built secure APIs, asset licensing, and multi-platform delivery systems using Node.js and Firebase.
- Engineered scalable infrastructure with modular microservices architecture and CI/CD pipelines.

Freelance Web App Developer — Fiverr

May 2022 – Present — Remote

- Delivered 10+ client projects ranging from responsive websites to dynamic full-stack applications.
- Developed and deployed web apps with React, Firebase, and RESTful services.
- Managed deployments on DigitalOcean and AWS with Docker-based workflows and uptime monitoring.

Software Development Intern — SalesGO

Jan 2022 – Mar 2022 — Surat, India

- Improved enterprise web UI responsiveness and reduced load times.
- Collaborated with backend teams to optimize API interactions and state management.

Projects

Meshables

Jul 2024 – Present

- Web-first 3D asset marketplace with integrated payments, licensing, and team collaboration features.
- Designed full-stack system with Firebase backend, secure auth, and real-time asset delivery.
- Built responsive front-end with dynamic preview components and user dashboards.

moddest.in

Jul 2024

- Built and launched moddest.in, a premium keyboard and desk accessory brand in India.
- Received 400+ user reactions on launch day across platforms, with the UI receiving standout praise for its minimalism and polish.
- Designed the brand identity, frontend experience, and backend architecture; handled end-to-end operations.

Zurks - Cybersecurity Dashboard

Aug 2024

- Web platform for threat monitoring with real-time alerts, built using Flask and React.
- Integrated data visualization tools for traffic analysis and threat detection.
- Emphasized modular code, quick deployments, and real-time API updates.

Fluxfeed

May 2024

- Developed a dynamic, component-first blog platform allowing each article to embed custom interactive elements.
- Integrated support for live 3D models, charts, forms, and other reusable components per post.
- Engineered backend with Firebase and modular architecture to support scalable publishing and content editing.
- Built intuitive React-based editor for composing, previewing, and deploying personalized blog experiences.

Education

Vishwakarma Government Engineering College

Sep 2023 – Present

- B.E. in Information Technology — Focus: Cloud Systems, Security, and Web Infrastructure

Chhotubhai Gopalbhai Patel Institute Of Technology

Jan 2020 – May 2023

- Diploma in Computer Engineering — GPA: 8.55
- Focused on IoT, Networking, and Web Application Security

Certifications Awards

SSIP Hackathon

Dec 2023

- **2nd Place Winner** among 4700+ teams for building an AI-powered file classification system integrated with live server workflows.
- Awarded a grant of **USD 1200** for innovation, technical feasibility, and real-world applicability.

Spark The Summer Hackathon

Jul 2024

- **3rd Prize Winner** for “Meshables” – a full-stack 3D asset platform built with scalable infrastructure and dynamic previews.
- Received a cash prize of **USD 200** for technical excellence and product innovation.

Languages

- English (Fluent), Hindi (Fluent), Gujarati (Native)

Key Traits

- Passionate about full-stack development and building clean, maintainable codebases.
- Strong focus on user experience, performance, and scalable system architecture.
- Proactive learner, keeping pace with emerging technologies in web and mobile development.
